28. My youngest child is into space and astrophysics. He spends hours sitting outside the house, **_ _ z _ _ _** at the night sky.
29. Sorry, my son. You didn't study for the exam, you failed, now you have to face the **_ _ _ i _** and deal with the consequences of your laziness.
30. There's no way I can afford to go to Provence this summer. Spending two weeks there would simply break the **_ a _ _**.

CZYTANIE

Odpowiedz na pytania do każdego z tekstów, podając w arkuszu odpowiedzi tę z podanych wersji: a, b, c lub d, która najlepiej odpowiada na pytanie. Kolejne teksty nie są ze sobą związane.

Text 1

The business world is awash with metaphors referring to health, fitness and sport. Stock market activity can be lively or sluggish, while corporations can pay fat cat bonuses. There's a need for businesses to become less flabby and adopt lean management techniques; employees are implored to be flexible and go the extra mile as the bar is being raised all the time in the race for customers. It is a wonder that we are not all sick from gorging on this diet, but like an extra piece of cake at a birthday do, there's room for one more metaphor with the in-vogue word of the moment that's prefixing anything it can lay its hands on - climbing frames at the ready. Flexible sounds good, but agile sounds even better; flexibility is about suppleness, but is somehow more static than agile. Agility conjures up images of monkeys swinging effortlessly from one tree to the next, gazelles' light-footed, springing leaps or a ballet dancer's dizzy pirouette - no wonder, then, that the business world is keen to acquire these facets.

1. The text implies that...

A/ Businesses are overweight	B/ Business language is obsessed with fitness
C/ Business metaphors aren't accurate	D/ Business should be about efficiency
2. The reader is advised to...

A/ be ready to climb	B/ eat an extra piece of cake
C/ be prepared for the new in phrase	D/ learn the word prefix
3. Agile is better than flexible because...

A/ it's more dynamic	B/ it is static
C/ it's more supple	D/ it sounds more accurate
4. According to the metaphor used by the writer, monkeys', gazelles' and dancers' abilities....

A/ are magical	B/ can be bought
C/ are desirable	D/ are not surprising

Text 2

A new mood of proud nationalism is emerging in economically resurgent Iceland after an out-of-control banking system sank the country into financial meltdown exactly five years ago. Riding this wave of confidence is 38-year-

old prime minister, Sigmundur David Gunnlaugsson, elected in April on populist promises of mortgage relief for every homeowner.

Gunnlaugsson earned his spurs in years of outspoken campaigning against the foreign creditors who still haunt Iceland, particularly the British and the Dutch governments, which intervened after the collapse of Landsbanki – the bank behind Icesave – on 7 October 2008.

Hundreds of thousands of ordinary British and Dutch savers had previously switched their savings into online Icesave accounts, attracted by market-beating interest rates and promises that: "You can also rest assured that with Icesave you are offered the same level of financial protection as every bank in the UK."

5. Iceland...

A/ is a nationalist country

C/ is in a strong economic condition

B/ is in economic meltdown

D/ is recovering from a crisis

6. Gunnlaugsson...

A/ owns some spurs

C/ talks too much

B/ has a lot of experience

D/ doesn't like the British and the Dutch

7. Landsbanki...

A/ is the financial front for Icesave

C/ collapsed owing money to Britain and Holland

B/ collapsed owing money to Icesave

D/ had its assets frozen

8. British and Dutch savers...

A/ were given good protection

C/ received very good interest rates

B/ were too greedy

D/ lost money when Icesave collapsed

Text 3

If private companies started to behave in eccentric and quaint ways, we would conclude that they were on the slide and sell their shares. Yet the Government, which is responsible for spending 40 per cent of national income, is treated as though it were an offshoot of the heritage industry.

This Government, for example, dictates not only what is taught in schools but, through its maths and literacy hours, how it should be taught. Ministers fret about how they can support family life, discourage teenage pregnancy, control yobbery. Increasingly, governments take decisions that may affect the future of humanity: about the control of carbon dioxide emissions, the use of nuclear power and genetic science.

This requires a parliament that conducts its business in a serious and modern fashion. Yet we are happy for the Queen to arrive in a gilded carriage, and then open a parliament which cannot provide its members with decent offices. It is all most peculiar: we treat our elected representatives as buffoons while we treat the members of an hereditary clique with utmost reverence. It is as though we have no faith in our ability to elect good rulers or to hold them to account and therefore need the feudal grandeur of monarchy to give our system of government some legitimacy.

There are practical reasons for being a republican. The monarchy is expensive to maintain and it locks up, away from public view, some of the nation's great art and treasures. The notion that the tourist trade would be damaged by the abolition of a functioning royal family is nonsense. Living royals clutter up the potential attractions. Versailles, more than two centuries after the French Revolution, gets more visitors than any other historic site in the world.

But the most important reasons are to do with what the monarchy symbolises. It boils down to three things. First, the monarchy symbolises our status as subjects, not citizens. 'My government,' the Queen will say on Wednesday. We all know that it's not really her government, but it's certainly not ours. Royalty's defenders argue that the Queen cuts politicians down to size; on the contrary, because Ministers derive so many of their powers from the royal prerogative, which is outside parliamentary scrutiny, she gives them an inflated sense of their importance.

9. Government in the UK...

A/ can be quaint and eccentric

C/ has a long heritage in the UK

B/ is not a good investment

D/ isn't treated the same as business

10. The government has the power...

A/ to dictate

C/ to teach maths

B/ to proscribe teaching methods

D/ to enforce higher levels of numeracy

11. Ministers...

A/ want to encourage yobbery

C/ are worried about lots of things

B/ are jobs

D/ support family life and yobbery

12. There is a disconnect between...

- A/ the wealth of the Royal Family and the poverty of Government
- B/ the seriousness of the problems we face compared to the grandeur of the ceremony
- C/ the finery of the Queen's carriage and the shortage of offices in Parliament
- D/ our respect to the Royal Family and disrespect for our elected representatives

13. The monarchy...

- A/ has no faith in parliament
- B/ provides a symbolic legitimacy to government
- C/ are good rulers
- D/ are better rulers than MPs

14. According to the author, republicanism...

- A/ affects tourism
- B/ locks up art treasures
- C/ is a practical proposition
- D/ is an old idea

15. In the author's opinion, the monarchy...

- A/ is outside parliamentary scrutiny
- B/ cuts politicians down to size
- C/ gives MPs an exaggerated sense of importance
- D/ has an inflated sense of importance

TEST LUK

W arkuszu odpowiedzi wpisz słowo, brakujące w każdej luce. Uzupełnienie luk będzie łatwiejsze, jeśli rozpoczniesz od przeczytania całego tekstu. Dla ułatwienia w większości luk podano pierwszą albo ostatnią literę brakującego słowa, albo literę czy litery znajdujące się w środku.

In most cultures, marriage vows entail the promise of fidelity and lifelong (1) c_____t. In principle, marriage (2) v_____ are a contract – a reproductive contract – between two individuals to maintain both emotional and sexual (3) f_____y to one another 'til death do them part.' Monogamy. There are few species that (4) m_____ monogamous relationships between the sexes. It is commonly believed that males are more (5) pr_____, but new research is (6) _____dd_____ light on the prominence of female infidelity as well as the (7) c_____ of such behavior.

Female infidelity is common in the animal (8) k_____ as well as among humans. According to an (9) a_____ of 280 000 (10) p_____ tests conducted in 1999 by the American Association of Blood Banks, (11) _____x_____ 30% of children are fathered by extra-pair (12) c_____; that is, 30% of children in this sample were fathered by someone other than the woman's long-(13)t_____ romantic partner.

Several case studies (14) ex_____ this phenomenon and the associated psychological and social consequences. The New York Times reported a case of a Texas man who was (15) f_____ with the unnerving news that not one but several of his children were the product of extra-pair paternity. The bittersweet news came when the man was being tested as a (16) c_____ for a debilitating genetic disorder that his youngest daughter had (17) _____ff_____ with since birth. When the genetic test came back negative, he should have been elated, but knowing that both parents must be carriers for any child to be (18) in_____ with the disorder raised obvious concerns. Either the doctor had (19) mis_____ his child, or his child was the (20) p_____ of infidelity on the part of his wife. DNA paternity testing confirmed that he did not father his youngest daughter. This motivated him to obtain paternity tests for his three other children, only one of which had been (21) s_____ by him.

A team of scientists in Italy was asked to conduct DNA paternity tests to reveal relatedness among individuals involved in a murder case. The case involved three victims (two males, one female) that were (22) b_____ murdered. The suspected killer was later found hanged, a (23) pr_____ suicide. The police conducted a series of DNA paternity tests to (24) d_____ the paternity of the murdered female's child. It was presumed that the child had been fathered by the suspect, the man who had hanged himself, because he had been in a long-term relationship with the (25) sl_____ female. However, DNA paternity testing revealed that the child was actually fathered by one of the other (26) _____ed young men. It is not uncommon in the animal literature to find

(27) o_____ that will have offspring (of a single litter) fathered by several males. For example, in most (28) _____ss_____ birds, any given (29) _____ch can contain eggs fathered by two or more males. However, this (30) ph_____ has rarely been described or discussed in humans.
