TO TEACHERS CORRECTING THE PAPERS:

1. Please note that the *Olimpiada* is a highly competitive event whose main focus is on language accuracy, not on communicative effectiveness. We assume that virtually EVERY participant can communicate in English.
2. Even very good students can have problems with qualifying because we cannot deal with more than 600 - 700 students at the regional stage for practical reasons. Thus, do not treat failure as a mark of poor learning and/or teaching. When the test has to be very short (only 60 items), and under 3 per cent of competitors can qualify, mere luck also plays a role.
3. In open-ended questions the answers given in the KEY are not the only possibility. When marking the tests, allow your common sense to decide whether or not to accept a student's answer. However, any answer accepted must be fully correct (this includes accuracy of translation) and must meet the formal criteria (number of letters, letter given, etc.).
